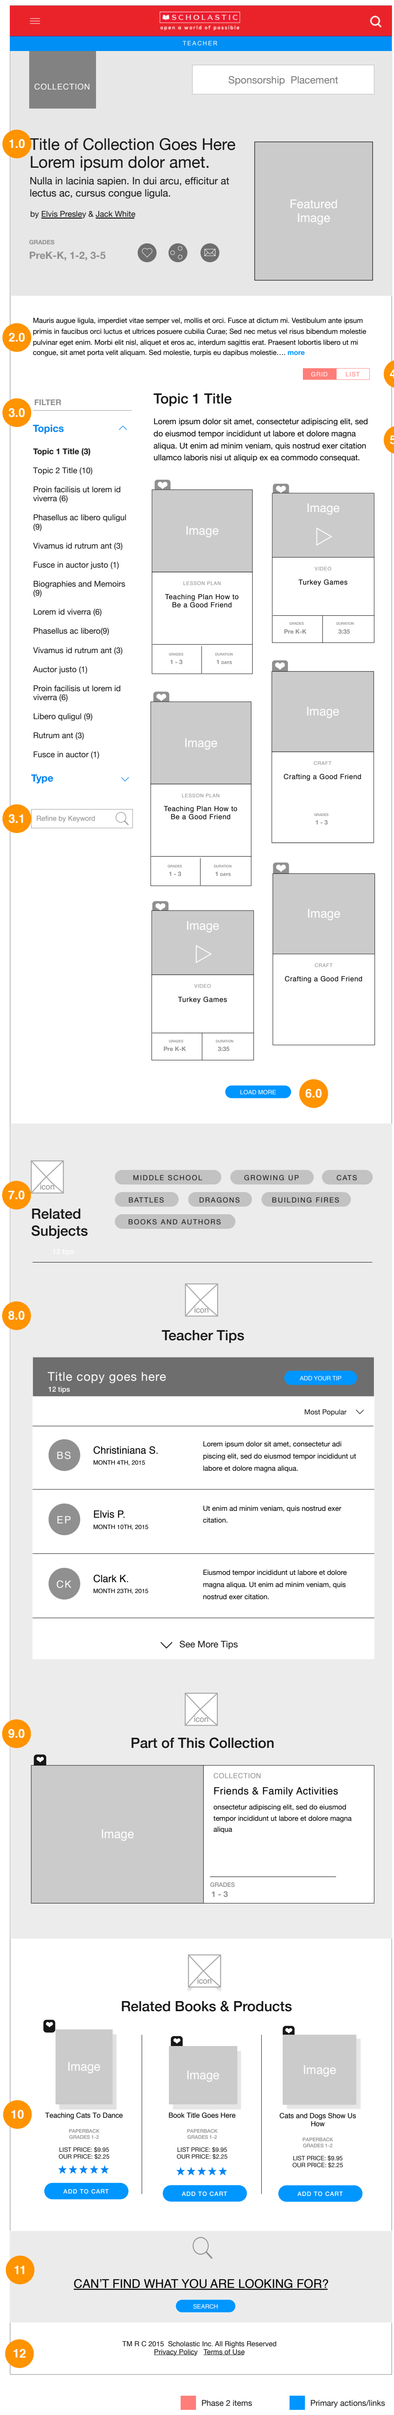
Scholastic: Collection Design B



Phase 2 items Primary actions/links

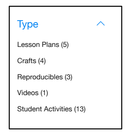
NOTES: DESIGN B

The format of the content on the Collection page is based on the format of the Lesson Plan template.

1. Header: Title, subtitle, authors, grade ranges,share button and optional image. Author names link to author bio page if available.

2. Synopsis: Shows first paragraph or ~250 chars. Clicking on "more" reveals the rest of the synopsis copy.

3. Filter by topic or content type: Default view shows the first topic selected with the Topic filters expanded. If there are less than 20 total options (topic and content type combined) both menus are expanded. If there are more than 20 options then the content type menu is collapsed as a default and only one selection option can be open at a time. Clicking on an option automatically deselects the prior filter and collapses the other option menu.



Filter by type expanded

3.1 Refine by Keyword: When the user types in a keyword and hits enter, the keyword is used to further filter the current active filter results. ie. if Topic 1 is shown then the page would show Topic 1 results filtered for the keyword.

The numbers next to the topic listings would update to reflect the keyword refinement. Any topic or content type that does not contain any results will be displayed as greyed-out and inactive.

A user can clear the keyword and reset the results by clicking the x button that appears on the top right corner of the search term (see above).

4. View by List or Grid toggle: The grid view is selected by default.

5. Topic content area: Summary copy (optional). If there is no summary for the topic, then nothing is shown. Note: There is no summary copy for content types.

First six content cards are shown.

6. View All button: Clicking on this button reveals all the content within this topic. Button is only visible if there are more than 6 items within the selected topic.
